

MIRAGE · Demo inputs to copy and paste

Browser extension · Desktop companion · CLI. All data is made up. Scores checked with MIRAGE's detector.

Tip: copying from a PDF can add line breaks where the text wraps. That's fine in ChatGPT (pasting never sends). For CLI commands, type them or copy one line at a time.

1 · Browser extension (chatgpt.com)

A1 · Clean prompt

No popup · 0/100

Explain how UPI payments work in three simple lines.

A2 · Personal details ★

Critical 100/100 · 5 hidden

Hi, I'm Priya Nair. My PAN is BNZPM2501K, Aadhaar 2341 2341 2346, phone 98450 12345 and email priya.nair@gmail.com. Write a short letter to my bank asking them to update my KYC.

A3 · Secrets

Critical 100/100 · key + password removed

My deploy keeps failing. Config: AWS_ACCESS_KEY_ID=AKIAQ7Z3MIRAGEDEM042 and db password=S3cr3tPass@2026. What is wrong?

A4 · Health

High 52/100 · name + DOB hidden, health kept

My name is Arjun Menon, DOB 14/03/2002. My HbA1c is 7.9 and I take metformin. What diet should I follow?

A5 · Card + OTP

Critical 99/100 · card + OTP removed

Why was my payment declined? Card 4111 1111 1111 1111, expiry 12/28, OTP 482913.

A5 · Disguised

Email + phone hidden

Email me at priya.nair [at] gmail [dot] com and call +91-98450-12345.

A6 · Private Compose

Toolbar shield → Private Compose → paste A2 → Insert protected

2 · Desktop companion (ChatGPT Mac app)

B2 · Popup while typing ★

High 55/100 · 4 hidden

I'm Rahul Sharma. My PAN is PQRSX6789K and my UPI is rahul.sharma@okhdfcbank. Draft an email to HDFC support, IFSC HDFC0001234, asking why my refund is late.

Popup opens by itself ~0.15 s after you stop typing. Press Enter → nothing sends. Click Protect & Send.

B3 · Secret in code

Critical 71/100 · key removed

Fix this code: `const key = "sk-proj-Xy7Qm2Lp9Rt4Vb8Nc3Kd6Hf1Js5Gw0Ez"; fetch(url, { headers: { Authorization: key } })`

B4 · Cancel

Paste A2 → popup → Cancel → text untouched

B5 · Private Compose

Press `⌘+M` → paste B2 → Insert protected

3 · CLI (terminal)

Setup (before the demo)

once

```
npm install -g https://github.com/NinadPandith/Mirage-Cli/raw/main/release/nexora-mirage-cli-0.1.8.tgz
```

```
mirage maps clear --yes
```

```
mirage demo
```

```
cd mirage-demo
```

C1 · Show the log

key, email, Aadhaar, phone

```
cat error.log
```

Windows: **type** error.log

C2 · Stops the secret

"Nothing was written."

```
mirage mask error.log
```

C3 · Hide the rest

1 secret removed · 3 hidden

```
mirage mask error.log --strip-secrets
```

C4 · Real details back

3 placeholders restored

```
mirage unmask reply.txt
```

C5 · Scan folder

3 to hide · 1 secret

```
mirage scan .
```

C6 · Chat with Claude (needs internet)

Claude sees «PAN_1»

```
mirage chat claude
```

```
My PAN is PQRSX6789K. Write one line confirming my PAN.
```

```
my password is Hunter@123
```

```
/exit
```

C6 · Proof (Mac / Linux)

first = 0, second ≥ 1

```
grep -r "PQRSX6789K" ~/.claude/projects/*mirage-demo* | wc -l
```

```
grep -r "PAN_1" ~/.claude/projects/*mirage-demo* | wc -l
```

C6 · Proof (Windows PowerShell)

0

```
(Select-String -Path "$HOME\.claude\projects\*mirage-demo*\*.jsonl" -Pattern "PQRSX6789K" -SimpleMatch).Count
```
